Makaton	No
British Sign Language (BSL)	No
Other	No

Statement of Compliance

The Responsible Individual must prepare the statement of compliance.

CIW have published $\underline{\text{guidance}}$ on completing the quality of care review which provides advice on what could be contained within the statement of compliance.

Set out your statement of compliance in respect to the four well-being areas below.

The extent to which people feel their voices are heard, they have choice about their care and support, and opportunities are made available to them.

During the care planning process, we pride ourselves on ensuring that all our service users are at the centre of their care pack age. We ensure that we gain and record a full live capture of e ach individual's needs, wishes along with a detailed support plan. Once the care plan is devised, we ensure that the service us ers are made aware that any details or wishes that have chang ed can be amended as and when required.

Care packages and support plans undergo a review every 3 m onths. We complete our Voice Of the Customer Quality feedback calls/ visits quarterly, The Voice of the Customer is a process to receive feedback from the service user about their experience of the service they receive and the extent to which their desired outcomes are met. Service users are asked their thoughts and feelings around Feeling safe, supported, connected and feeling in control of their care.

Service users are also aware that we have an open door policy and are always on the end of the phone should they wish to ma ke any adaptations to their personal support plan.

Field Care Supervisor's work very closely with all our service us ers and families, to ensure that the care that is being received i s of a high standard and that all requirements are being met. Al though we aim to keep complaints to a bare minimum we under stand that at times they may occur. We take every complaints eriously and aim to act on and resolve any complaints in a timely manner. All service users are made aware of the complaints policy and how to make a complaint. Service users may mention their complaint to a care worker who is able to then feedback relevant information to their line manager.

It is just as important to us as it is service users families that the y have an active input into their loved ones care and support pl ans and be able to have peace of mind and an insight into what tasks are being supported within service users visits. With service users permission families are able to access an online portal where they can witness a live snap shot of individual visits. The option to gain such fantastic technology is offered at the point of completing the care and support plan and again at the service users 7 day review.

The extent to which people are happy and supported to maintain their ongoing health, development and overall wellbeing. For children, this will also include intellectual, social and behavioural development.

We understand the importance of maintaining positive professi onal relationships with service users and monitoring their ongoing care needs and overall well being.to do this we use our feed back from the Annual Quality Audits, Voice of the Customer (QA) RI Regulation 73 visits and our daily communications with our Field Care Supervisors, carers and service users. Feedback from carers via supervision, team meetings, field observations and appraisals has allowed us to maintain continued support with our service user and better understand their ongoing health and wellbeing needs.

We communicate well will the local authority and other health pr ofessionals via email and telephone. These are usually re-activ e conversations where action is going to be taken, this is fed ba ck to the service user so they are always aware of the help they are going to be receiving.

From our last Quarter of Voice of the Customer Feedback, we can see that our service users felt that they were supported in maintaining their personal appearance, supported well to eat and drink what they choose at mealtimes, staff treat them will dignity and respect and are will to listen and encourage them in expressing their choices. In regards to medication management, service users who received support with medication administration feel that staff support them to help and maintain their health and wellbeing.

The extent to which people feel safe and protected from abuse and neglect.

We understand the importance of people feeling safe and prote cted from abuse and neglect, We promote Safeguarding in eve ryday practice through:

Relationship-based support and partnership working-building t rust/enabling individuals to talk about concerns, we participate i n investigations/strategy meetings/share best practices and co ncerns/work with statutory services

Person-Centred Care plans risk assessments are created to ref lect individual outcomes, indicate vulnerabilities/risks specific to individuals, ensuring steps are taken to prevent/reduce the likel ihood of abuse/harm/self-neglect, Individual Medication risk ass essments.

Training: Safeguarding training is provided for all operation and care workers yearly; the topic of safeguarding may also be disc ussed during themed office-based supervisions or impact and c onsequence training.

Continuity of carers: wherever possible we use small teams to a n area, this is to build relationships and trust Training - we ensu re all carers are fully trained and know the signs to look out for and procedures to follow to not influence clients

Business Continuity: prioritises individuals according to their lev el of vulnerability

On-call: is operated outside office hours, Carers and Service u sers have access to the out-of-hours line to notify us of any pro blems or concerns that may arise.

Quality Board: the quality board undertake periodic reviews of s afeguarding, setting priorities for improvement in practice. Whe re we have learnt from serious incidents and built a best practic e learning from them for all staff to access and learn.

Capturing safeguarding- the policies in place support us to iden tify and capture possible safeguarding quickly so they can be d ealt with in a timely manner. Our Policies support safe practice, including whistleblowing/disciplinary/safer recruitment/H&S. Saf eguarding is given a high profile internally through training/new sletters/supervision/staff handbooks/group meetings and safeg uarding leads. Recording and reporting suspicions/allegations/ observations/disclosures of abuse to the local safeguarding tea m and CIW in a timely manner, We Appoint designated officers to oversee the investigation. Add the incident onto ACP, which alerts senior management that a protection incident has been r eported and is under investigation. Escalating any possible saf eguarding by Taking immediate action to protect/support the in dividual. Co-operate with the ongoing processes, taking our lea d from the LA/Police.

The following section requires you to answer questions about the staff and volunteers working at the service.

Number of posts and staff turnover

The total number of full time equivalent posts at the service (as at | 31 31 March)

The following section requires you to answer questions about each staff type including information about the number of filled and vacant posts, the training undertaken, the contractual arrangements in place and the qualifications of those staff.
